

'Mini'-Water Cycle

- 2 Make your own miniature water cycle.

What you need:

- big glass jar with screw-top lid
- soil
- sand
- plants
- bottle cap
- pebbles/
small rocks

What to do:

- Add small rocks or pebbles to the jar first, then the sand and finally the soil.
- Add plants to the soil.
- Fill the bottle cap with water and place it in the jar.
- Put the lid on the jar and put it in a sunny place.
- Watch your miniature water cycle in action!

On the back of this sheet, describe what you see happening.
